HOW TO APPLY STICKERS

WET METHOD

APPLY DECALS WITHOUT WRINKLES OR BUBBLES

01 Clean surface thouroughly, and keep them free of dirt and dust.
TIP: For the best results, install your stickers in a shaded area away from direct sunlight.

02

Rub your sticker down before peeling to ensure a nice firm grip between the masking and the vinyl.

03

Peel the masking away from backing paper. The vinyl graphic should be stuck face-first to the masking material.

04

Spray the surface and back of sticker with soapy water.
You can reposition.
TIP: Use dishwashing liquid.

05

Apply sticker to surface. Use something flat to smooth down the vinyl, applying pressure to expel water.

06

Allow to dry. Spray with water, then remove the masking by starting in one corner then slowly peel from vinyl sticker.
